EDUCATION

Manipal Institute of Technology July 2023 – May 2027
B.Tech in Computer Science and Engineering | *CGPA: 6.2 (62%)* Manipal, KA
Class XII: 86.83% · Class X: 86.40%

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Java, C++, C
Backend & APIs: FastAPI, Node.js, RESTful API Design, Microservice Architecture
Frontend: React.js, Next.js, Tailwind CSS, Responsive UI
Databases: PostgreSQL (Supabase), Schema Design, Row-Level Security, PL/pgSQL
AI & GenAI: LLM Integration (Ollama/Llama 3, Gemini API), RAG-Style Grounding, Semantic Search (Embeddings), AI Coding Assistants (Copilot, Claude, Cursor)
Testing & Tools: Playwright, Unit & Regression Testing, Git/GitHub, CI/CD, Agile/Scrum, Jira
Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

GoPerch Innovations Pvt. Ltd. | *Full Stack Developer Intern* Completed
- Delivered 7+ ERP inventory management features end-to-end – front-end components, REST API endpoints and database layers – into a live production system.
- Worked in a 10-developer agile team through sprint planning and peer code review, shipping pull requests through CI/CD release cycles.

IGS Global | *Software Testing Intern* Completed
- Took a self-built GenAI test automation platform (see QA Copilot Dashboard) from personal prototype to production tooling in live testing workflows.
- Debugged test failures by tracing logs and code to root cause, and built a log-clustering pipeline segmenting user sessions into behavior personas to prioritize coverage.

PROJECTS

QA Copilot Dashboard – *Agentic, Self-Healing Test Automation Platform* | Python, FastAPI, React, Playwright, Ollama (Llama 3)
- Built a GenAI platform converting plain-English user stories into structured test cases (Gherkin/BDD) and runnable Playwright scripts grounded in the site's live DOM, using a locally hosted Llama 3 with zero external API calls.
- Engineered a self-healing locator engine using sentence-transformer embeddings and cosine similarity, resolving 18 of 37 previously-failing steps with no manual maintenance.

NutriTrust – *Smart Pantry & Expiry-Tracking App* | Next.js, React, Supabase (PostgreSQL), Gemini API Live | GitHub
- Built a household pantry app with shared shopping lists and scan history, using the Gemini API for OCR to extract items and expiry dates from receipts and labels.
- Designed the schema with Row-Level Security and security-definer PL/pgSQL functions; traced and fixed a production infinite-recursion bug (Postgres 42P17) to a self-referencing policy.

Enterprise Management Software – *3-Service ERP Platform for Windscapes* | TypeScript, React, Python, Nginx, REST APIs GitHub
- Built a 3-service ERP for an external client – React/TypeScript front-end, Python REST API, Nginx gateway with SSL and 3-tier role-based access – covering 5+ modules.

Wrdl.io – *Real-Time Multiplayer Word Game* | Next.js, TypeScript, Node.js, Socket.io Live | GitHub
- Built sub-second multiplayer state sync on an event-driven Node.js/Socket.io back-end.

CERTIFICATIONS

Google AI Online Professional Certificate | *Coursera* | Certificate
Designing Industry-Ready Scalable APIs & Database Systems | *MSSP 2025* | Certificate
Forage Job Simulations | *Deloitte Technology; AWS Solutions Architecture* | Deloitte • AWS Jul 2025
