PROFESSIONAL SUMMARY

Computer Science undergraduate (Batch 2027, MIT Manipal) with 2 internships and 5 deployed projects across 7 languages and frameworks. Built a 3-layer AI nutrition platform (React → Python → Node/Express) and a 3-service enterprise ERP platform with Nginx gateway, role-based auth, and CI/CD. Aligned with full-stack, data engineering, and intelligent software engineering roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, C, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Socket.io, Tailwind CSS, Bootstrap
Backend & Databases: MongoDB, REST APIs, Microservice Architecture, Scalable API Design
Cloud & Tools: AWS Architecture (Forage), Nginx, Git, GitHub, Vercel

WORK EXPERIENCE

Go Perch — Software Engineering Intern

Current

- **Delivered 7+ ERP inventory management features** into a live production system, streamlining workflows and improving usability across multiple business modules.
- **Collaborated in a 10-developer agile team** — sprint planning, code reviews, and CI/CD deployment cycles — shipping scalable, production-ready code.

System Tron Company — Software Engineering Intern

Completed

- Completed a full software engineering cycle — requirements, development, testing, and delivery — on real-world client projects.

PROJECTS

Windscares — Enterprise ERP Platform [\[GitHub\]](#) · TypeScript · React · Python · Nginx · REST APIs · CI/CD

- **Architected a 3-service modular ERP platform** — React/TypeScript frontend, Python REST API backend, Nginx gateway — spanning 5+ modules: inventory, finance, reporting, auth, and dashboards.
- **Implemented RBAC with 3 permission tiers** and SSL termination via Nginx, routing 100% of ingress through a single secure gateway.
- **Automated CI/CD for all 3 services** in a monorepo, enabling one-command releases and eliminating environment-specific config drift.

NutriTrust — AI-Powered Nutrition Platform [\[Live\]](#) [\[GitHub\]](#) · React · Node.js · Express · Python · REST APIs

- **Engineered a 3-layer full-stack AI system** — React, Node.js/Express REST API, Python analytics — delivering real-time nutrition insights and personalised alternatives from food label data.
- **Integrated 2+ REST APIs and 3 data visualisation components** (charts, score meters, comparison tables) to surface AI-ranked nutrition alternatives instantly.
- **Python analytics engine benchmarks products across 5 nutritional dimensions** (protein, sugar, fat, fibre, calories) against daily-intake thresholds to power recommendations.

Wrld.io — Real-Time Multiplayer Wordle [\[Live\]](#) [\[GitHub\]](#) · Next.js · TypeScript · Socket.io

- **Built a Sub-second game-state sync across concurrent players** via Socket.io event-driven architecture — <1s latency, 0 client-side library dependencies.
- **TypeScript state machine manages 4 game phases** (lobby → active → result → replay) with type-safe transitions, eliminating runtime sync errors.
- **Deployed on Render** with persistent WebSocket connections supporting multiple isolated simultaneous rooms.

Portfolio Website [\[Live\]](#) [\[GitHub\]](#) · HTML5 · CSS3 · JavaScript · CSS Grid · Flexbox

- **Built a fully responsive portfolio** using CSS Grid and Flexbox showcasing 5 live projects across 6 sections.

CERTIFICATIONS

- Deloitte Australia Technology Job Simulation — Forage (Jul 2025) [\[Certificate\]](#)
- Designing Industry-Ready Scalable APIs & Database Systems — MSSP 2025 [\[Certificate\]](#)
- AWS APAC Solutions Architecture Virtual Experience — Forage (Jul 2025) [\[Certificate\]](#)
